

# Redefining Learner Assessment

Align. Assign. Assess.

- 1 Allowing publishers and teachers to create sets of questions or assessments and assign them to students
- 2 The platform supports both standard & adaptive assessments
- 3 Assessment reports for teachers to track student performance
- 4 Exclusive assessment reports for school and district administration

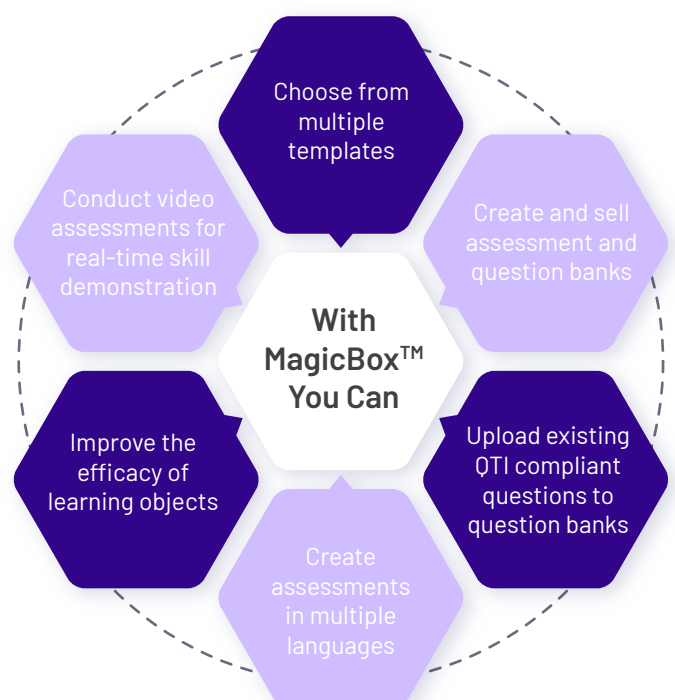

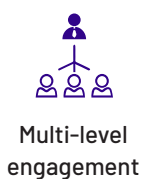

# The Need for Assessments

## How MagicBox™ Improves Assessments

What makes MagicBox stand apart is that we continuously innovate to enhance its features and functionalities. All users, teachers, school admin, publishers, students, and corporates have the most satisfying experience, and this holds for its assessment function as well.

MagicBox™ provides:

# Using the Assessment Function on MagicBox™ is Effortless

## ✓ Multiple Format

Teachers can form standard and adaptive assessments using various formats, including multiple/single-choice answers, FIB, descriptive or audio options. Also, assessments/assignments can be created in several languages to benefit students who are not native English speakers.

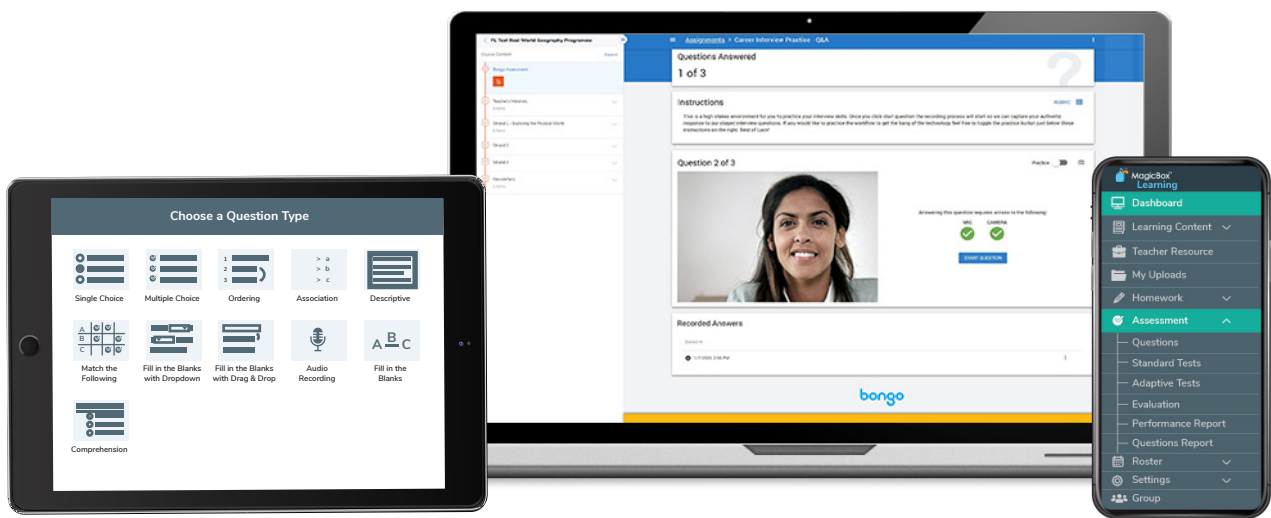

## ✓ Easily Create Assessments

You can also add already existing questions from the question bank. Then publish it with just a single click! Then you can assign it to a particular class or group for a specific date.

## ✓ Provide Video Assessments

Teachers can provide personalized feedback to each student. Besides, they could speak to them on a 1 to 1 basis, which is more time-saving than written feedback.

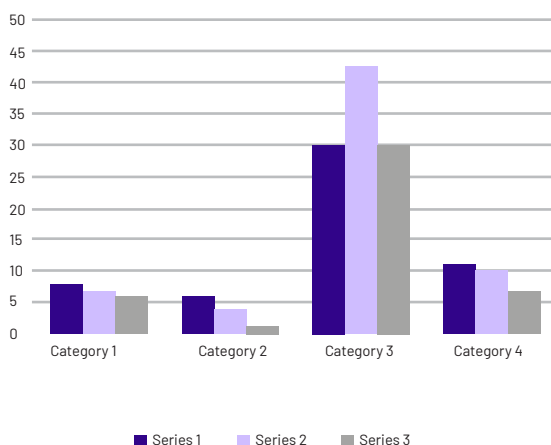

Video feedback gives a personalized touch, which can be highly beneficial, especially in remote learning.

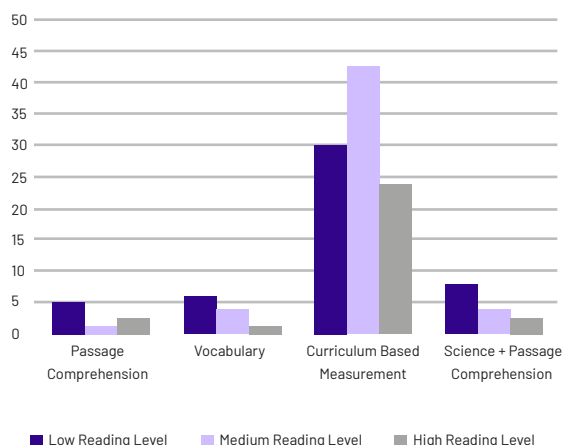

## ✓ Instantly Score Assessments

Instant feedback helps in improving the learning outcomes. A study by the University of Minnesota found that students who received immediate feedback were able to comprehend the material better. Another study found that instant feedback also improves the autonomous learning ability among students.

Impact of Immediate Feedback on Reading Achievement

Impact of Delayed Feedback on Reading Achievement

## Eases Standards-Based Assessment

With MagicBox, standardized assessments can be created and deployed with just a few clicks. They can help ascertain the level of understanding of students' concepts and their ability to apply this knowledge to practical situations. They can be used to test reasoning, critical thinking, interpersonal skills, and more. They help educational institutions implement Next Generation Science Standards (NGSS), which is essential for STEM education.
